PROFESSIONAL SUMMARY

AI & Data Science Developer pursuing a B.Tech in Computer Science with a specialization in AI & Data Science, focused on building practical machine learning solutions, intelligent applications, and modern web experiences. Experienced in developing ML prediction systems, AI chatbots with long-term memory, data analytics workflows, and responsive full-stack interfaces using Python, scikit-learn, PyTorch, React, FastAPI, and MongoDB.

TECHNICAL SKILLS

Languages	Python, Java, C++, SQL, TypeScript, HTML, CSS
Frameworks & Libraries	React, FastAPI, NumPy, Pandas, Matplotlib, scikit-learn, PyTorch
Databases	MongoDB, MySQL
Data & BI	Excel, Power BI, Data Analysis, Data Visualization, Machine Learning
Developer Tools	Git, GitHub, VS Code, GitHub Copilot, Cursor, Claude AI
Core Areas	Machine Learning, Data Science, NLP, AI Applications, Full-Stack Development, Data Pipelines

EDUCATION

Poornima University, Jaipur, Rajasthan 2024–2028
B.Tech in Computer Science (AI & Data Science)

CGPA: 8.05/10 (through 3rd semester)

EXPERIENCE

AI Intern — XYlofy June 2026 – July 2026

- Developed and supported machine learning solutions for practical business problems.
- Applied data analysis and ML techniques to derive data-driven insights.
- Worked through model development, evaluation, and solution iteration in an internship environment.

Smart India Hackathon 2025 — Participant

- Participated in a national-level innovation and problem-solving competition.
- Collaborated on technology-driven solutions for real-world problem statements.
- Applied analytical thinking, rapid prototyping, and software development skills in a competitive environment.

Deloitte — Data Analytics Virtual Experience — Forage

- Completed practical data analytics and business intelligence tasks.
- Worked with analytical workflows to interpret data and communicate actionable findings.
- Applied structured problem-solving approaches to business-oriented datasets.

British Airways — Data Science Virtual Experience — Forage

- Applied NLP and predictive modeling techniques to practical data science problems.
- Analyzed data and translated model outputs into stakeholder-focused insights and reports.
- Practiced end-to-end analytical thinking from data preparation to interpretation.

Data Science Course — Tutedude

- Built foundational expertise in Python, statistics, data analysis, and machine learning.
- Practiced applying ML concepts to structured datasets and real-world problem scenarios.

PROJECTS

Placement Prediction System Live Demo

- Built a machine learning system to predict student placement probability using **scikit-learn** and **PyTorch**.
- Implemented **feature engineering, preprocessing, model training, and evaluation pipelines**.

- Transformed predictive outputs into actionable insights for student career guidance.
- Focused on building an end-to-end ML workflow from data preparation through prediction.

Tech Stack: Python, scikit-learn, PyTorch, Pandas, NumPy, Machine Learning

Solace — AI Companion Chatbot

Live Demo

- Designed an emotionally intelligent, multilingual AI companion chatbot with adaptive personality and contextual conversations.
- Implemented **long-term memory** to maintain personalized information across conversations and improve continuity.
- Developed emotion recognition and response modulation capabilities for more empathetic interactions.
- Supported real-time chat and multiple AI companion personalities, including **Luna and Kai**.
- Built the backend architecture for scalable AI interactions using **FastAPI and MongoDB**.

Tech Stack: Python, NLP, FastAPI, MongoDB, AI/LLM Technologies

Gym Website

Live Demo

- Developed a premium animated gym marketing website using **React, Vite, Tailwind CSS, and TypeScript**.
- Built responsive interfaces focused on modern visual design, usability, and smooth user interactions.
- Created a polished digital experience suitable for client branding and marketing.
- Applied component-based frontend development and responsive design principles.

Tech Stack: React, Vite, Tailwind CSS, TypeScript ““

CORE STRENGTHS

- **AI-First Thinking:** Architecting machine learning solutions for practical, real-world problems.
- **Full-Stack Development:** Combining data pipelines, AI backends, APIs, and interactive user interfaces.
- **Rapid Iteration:** Quickly prototyping, testing, improving, and shipping modern applications.
- **Design Sense:** Building interfaces that balance usability, performance, and visual quality.
